RESEARCH INTERESTS

My interests center around optimization under uncertainty and its applications in stochastic programming and machine learning. A common thread in my research is the design and analysis of numerical algorithms to address risk in data-driven applications. I draw and extend ideas and tools from convex optimization, probability theory and numerical analysis while keeping an *operational* approach, with a balance between theoretical and practical contributions.

CURRENT POSITIONS

Princeton University, Aug 2022 - Present
Departmental Guest at the Center for Statistics and Machine Learning (CSML).

Rutgers University, USA, Jan 2022 - Present
Postdoctoral Associate at the Department of Management Sciences and Systems (MSIS), hosted by Prof. Mert Gürbüzbalaban.

EDUCATION

Ph.D. in Optimization and Machine Learning, Oct 2018 - Nov 2021

Supervised by Jérôme Malick, Université Grenoble Alpes, Grenoble, France.

B.S., M.S. in Computer Sciences and Applied Mathematics Sep 2015 - Sep 2018

Diplôme d'ingénieur from ENSIMAG, Grenoble France.

B.S., M.S. in Mathematics, Sep 2015 - Sep 2018

Master major in statistics, Université Grenoble Alpes, Grenoble, France. Degrees pursued in parallel to my engineering studies.

JOURNAL PAPERS

[1] **Yassine Laguel**, Mert Gürbüzbalaban, Necdet Serhat Aybat. A risk-averse perspective on acceleration for saddle point problems (Tentative title). *In preparation*.

CONFERENCE PAPERS

[10] **Yassine Laguel**, Krishna Pillutla, Jérôme Malick, Zaid Harchaoui. Device heterogeneity in federated learning: a superquantile approach. *Proceedings of the* 55^{th} *Annual Conference on Information Sciences and Systems (CISS 2021)*. https://arxiv.org/abs/2002.11223

[11] **Yassine Laguel**, Jérôme Malick, Zaid Harchaoui. First order optimization for superquantile-based supervised learning.*Proceedings of the Machine Learning and Signal Processing Conference (MLSP 2020) - Best Student Paper Award*. https://arxiv.org/abs/2009.14575

SOFTWARE

RandomizedProgressiveHedging.jl 2019

Julia toolbox for solving multistage stochastic problems by randomized versions of the progressive hedging algorithm. Gilles Bareilles, Yassine Laguel, Dmitry Grishchenko, Franck Iutzeler, Jerome Malick

SPQR 2020

Python toolbox for superquantile minimization. Yassine Laguel, Jérôme Malick, Zaid Harchaoui.https://yassine-laguel.github.io/spqr/.

TACO 2022

Python toolbox for chance constrained optimization. Yassine Laguel, Wim Van Ackooij, Jérôme Malick. https://yassine-laguel.github.io/taco/.

INVITED TALKS

International Conference on continuous optimization (ICCOPT) 2022

New perspectives on robustness via the Conditional Value at Risk.
Talk. Lehigh, USA.

Magnet Seminar 2022

Federated learning with heterogeneous data: a superquantile optimization approach.
Talk. Inria Lille, France.

University of Washington Machine Learning Seminar 2022

Convex risk measures : models, algorithms and applications in federated learning.
Talk. Seattle, USA.

Thoth Seminar 2021

Convex risk measures : models, algorithms and applications in federated learning.
Talk. Inria Montbonnot, France.

PhD. Defense 2021

Risk-averse optimization: models, algorithms, and applications in machine learning.
Talk. Grenoble, France.

ANSI Seminar 2021

On hidden convexity in chance constrained problems.
Talk. Los Alamos, USA.

Workshop on Communication Efficient Distributed Optimization 2021

Device heterogeneity in federated learning : a superquantile approach.
Poster. Online Seminar.

Workshop on Communication Efficient Distributed Optimization 2021

Device heterogeneity in federated learning : a superquantile approach.
Poster. Online Seminar.

Federated Learning One World Seminar 2020

Device heterogeneity in federated learning : a superquantile approach.
Talk. Online Seminar.
https://www.youtube.com/watch?v=W-oNzU04Y8I

SMAI-MODE Conference 2020

A DC approach for chance constraints.
Talk. Saclay, France.
https://www.youtube.com/watch?v=KB3sV-trEy4&list

Optimization for Machine Learning Conference 2020

Handling device Heterogeneity in federated learning.
Poster. Marseille, France.

ROADEF Conference 2020

Practical minimization of CVar-based risk functions.
Talk. Montpellier, France.

International Conference on continuous optimization (ICCOPT) 2019

On the interplay between generalized concavity and chance constraints.
Talk. Berlin, Germany.

TEACHING EXPERIENCE

Instructor

- Fundamentals of analysis and algebra. 50h.
  Grenoble INP. *Undergraduate Course*. Grenoble, France.
- Fundamentals of analysis and algebra. 50h.
  Unversité Grenoble Alpes. *Undergraduate Course*. Grenoble, France.
- Introduction to R. 2x30h.
  Université Grenoble Alpes. *Undergraduate Course*. Grenoble, France.
- Introduction to Python. 2x30h.
  Université Grenoble Alpes. *Graduate Course*. Grenoble, France.
- Convex and distributed optimization. 18h.
  Université Grenoble Alpes. *Graduate Course*. Grenoble, France.
- Numerical optimization. 25h.
  ENSIMAG. *Graduate Course*. Grenoble, France.

Guest Lecturer

- Distributionally robust machine learning. 4h.
  University of Washington. *Graduate Course*. Seattle, USA.
- Introduction to federated learning. 1.5h.
  ENSIMAG. *Graduate Course*. Grenoble, France.

PROFESSIONAL SERVICE

Committee Service

- Founder and Organizer of the Optim & ML Seminar at Rutgers University, since March 2022.
- Founder and Organizer of GORGeous (Grenoble Optimization Reading Group), at the Université Grenoble Alpes, from Sep. 2019 to Oct. 2021.
  https://sites.google.com/view/gorgeous-optim/
- Jury member for the International Tournament of Young Mathematicians (ITYM).
  Iasi, Romania. 2012.

Referee Service

- *Journal of Machine Learning Research (JMLR)*
- *Mathematics of Operations Research*
- *EURO Journal on Computational Optimization*
- *Automatica*
- *Optimization*
- *Journal of Optimization Theory and Applications (JOTA)*

Conference Service

- Program Committee : 51st International Conference on Parallel Processing (ICPP 2022).
- Organizer of the session First-order methods for Min-Max Problems at ICCOPT 2022.
- Organizer of the session First-order Methods for Minimax Problems at INFORMS 2022.

PROFESSIONAL EXPERIENCE

Research Internships

- University of Washington, Seattle, USA. 2018
  Initiated the series of works [6, 8, 10, 11].
- EDF R&D, Saclay, France. 2017.
  Led to the publication of the journal paper [7].
- WeSave, Financial Startup in Paris, France. 2016
  Worked on the establishment of quantitative criterion based on random correlations matrices to predict crises.

Consulting Activity 2016

- Conception and development of a transport management software for an international firm.

AWARDS

Best Student Paper Award 2020

Machine learning and signal processing conference (MLSP 2020).
Espoo, Finland.

Finalist of the International Tournament of Young Mathematicians (ITYM) 2012

Rank : 3^{rd}. Orsay, France.

Winner of the french tournament of young mathematicians (TFJM) 2012

Saclay, France.
